

HOW WE PARTNER

AT PAPER SCALPEL ROCK, WE DEVELOP AND DELIVER HIGH FIDELITY MEDICAL SIMULATION TRAINING EVENTS THAT CONNECT PARTICIPANTS AND OUR INDUSTRY PARTNERS IN WORLD CLASS EDUCATION EXPERIENCES.

Our unique expertise

AT PAPER SCALPEL ROCK, WE DEVELOP AND DELIVER HIGH FIDELITY MEDICAL SIMULATION TRAINING EVENTS THAT ENABLE PARTICIPANTS TO FULLY IMMERSE THEMSELVES IN REAL LIFE SCENARIOS.

Our purposefully designed and researched programmes allow participants to practise skills and responses with no risk to patients. We use a collegiate learning approach, with in-depth debriefing and case study workshops, providing an enhanced understanding of clinical, technical and non-technical skills across a range of scenarios.

Our brand name underpins our philosophy. The words Paper, Scalpel, Rock represent our approach to achieving quality and consistent results.

PAPER = KNOWLEDGE

We are devoted to developing and sharing knowledge. This includes the research, evidence, and scenario development that define an event, as well as the knowledge shared and accumulated amongst the experiences of all who attend.

SCALPEL = SKILLS

We are committed to enhancing the clinical, professional, and personal skillset of everyone attending our events. We do this by engaging them to take part, take action, and hone skills.

ROCK = OUTCOMES

Our objective is improved outcomes for patients, healthcare providers and the health care industry at large. Rock represents the solidity, longevity and confidence in the outcomes achieved on the day.

The PaperScalpelRock Advantage

Our bespoke simulation events are especially tailored to professionals and specialists within the medical field. We have a firm focus on real educational outcomes that match the needs of the specialty areas with which we work.

Our collaborative approach represents an innovative shift in the professional development of healthcare providers.

These simulations rely on our dedication to exceptional accuracy in their development and delivery. This combined with a world-class environment and dedicated team ensures that the scenario looks, feels, and sounds real, and elicits the fundamental emotions and responses to learn from.

Why Choose Us?

- **100% of attending doctors** find the course content to be useful
- **100% of attending doctors** recommend the course to colleagues
- **More than 70%** of attending doctors make improvements to their work practices
- **Our events offer CPD points** recognised by professional bodies
- **Expand knowledge, skills, and attitudes** for improved patient outcomes
- **Utilise the latest in training technologies** to develop best practice
- **Engage sales teams** with an exclusive opportunity to build relationships with customers
- **Gain unique insights** into medical culture to improve credibility and quality of future communications with doctors

Why Simulation?

THE LAST TEN YEARS HAVE SEEN A FOCUS ON THE IMPACT OF THE COST OF ERRORS ON THE HEALTHCARE SYSTEM.

Studies have found that an average of 100 patients die as a direct result of clinical errors a day in the USA alone (Institute of Medicine [US] Quality Chasm Series, focusing on assessing and improving the quality and safety of health care, 2000-2015). Simulation is a powerful tool to educate professionals about reducing patient errors and improving patient outcomes without increasing patient risk.

A decrease in working hours for doctors has resulted in a significant reduction in training time. Therefore doctors have reduced exposure to patients and less opportunity to observe difficult or unusual cases. Simulation training allows exposure to these cases, without risk to patients.

Simulation training also addresses the gap between traditional educational methods and real-life applications. After all, attitudes and behaviours cannot be taught in lectures or tutorials.

Our progressive approach to healthcare provider education ensures that attendees are learning practical and transferrable skills by challenging technical, cognitive, and clinical skills in realistic scenarios.

Simulation is deemed the gold standard in training for clinical, technical, and non-technical skills due to the results it creates. With PSR you will experience the platinum standard.

Specialised debriefing methods, which facilitate peer-to-peer learning, allow for the integration of learning experiences and encourages ongoing processing and education after the event.

“Simulation is deemed the gold standard in training for clinical, technical, and nontechnical skills due to the results it creates.”

Past event attendees say

- The scenarios and staff were realistic, unexpected and useful. The opportunity to participate as leader, follower and observer was fantastic.
- I will be improving equipment at my private hospitals based on this course.
- The formal (and informal) presentations on the clinical use of products will definitely change my anaesthetic practice. Improved skills with anaesthetic crisis. Improved crisis communication.
- Significant improvement in management of crisis situations. Many learning points and information which influence and improve future practice.
- Overall an excellent and very educational day, would highly recommend.

HIGH FIDELITY SIMULATION HELPS TEAMS AND INDIVIDUALS DEVELOP PREPAREDNESS AND INSIGHT THAT IS BEST LEARNED AND PRACTICED IN REALISTIC CONDITIONS.

Partner with PaperScalpelRock

PAPER SCALPEL ROCK'S INNOVATIVE SIMULATION EDUCATION METHODS ARE HIGHLY REGARDED AMONGST INDUSTRY PROFESSIONALS AND PARTICIPANTS ALIKE.

Our training methods engage professionals with hands-on, practical, relevant skills and knowledge by challenging and developing clinical and cognitive abilities. Our simulation events provide enormous incentives for attendees to meet their professional and personal priorities.

This sought after education represents the opportunity for Healthcare Industry partners to:

- employ simulation training events as a credible communication tool
- engage peer-to-peer education as an effective means of educating participants on your product
- generate positive product and brand associations
- support genuine education and development of the expertise of healthcare professionals

Our partnership methods hinge on connecting our solutions to your brands vision and values.

EDUCATION MODULES

When developing your customised event we will include the most effective methods for educating participants on your brand and products.

- Clinical technique scenarios
- Expert presentations
- Case study discussions
- Crisis event scenarios
- Skills workshops

DEBRIEFING

Our world class debriefing of scenarios is critical to the delivery of outcomes. Our team of facilitators are selected for their clinical and educational experience and expertise and are trained and held to our internal quality standards.

RESULTS ANALYSIS

As part of our commitment to best practice and continuous improvement, we analyse post event feedback as a vital means of maintaining the highest level of integrity in the delivery and results we achieve. Our pre and post event

analysis and reporting occurs in two phases. It provides (1) valuable insights into the value received and perceived through your investment and (2) highlights the key outcomes and benefits achieved through your investment.

Partnering with Paper Scalpel Rock means linking your brand to the platinum standard in medical training. Call us to discuss how we can work together to positively impact your industry presence, continuing professional education, and improved patient outcomes.
